

Primary - Maple Class

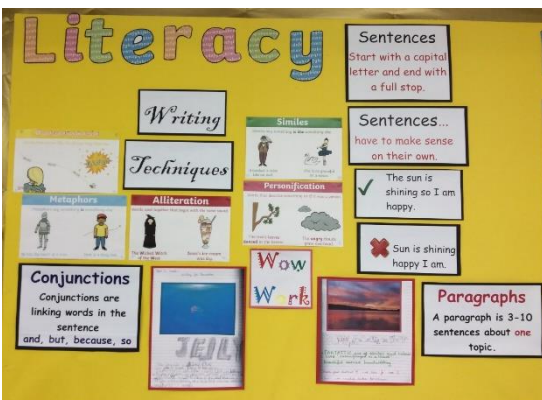

This term, in **Maple** class, the boys have been playing together and socialising well. We have been doing a range of activities that have helped them to interact positively including: nerf gun battles, football, den- building, visits to playgrounds and robot-building using blocks. We also celebrated World Book Day by dressing up (pictured here are Willie Wonka and Eliza Doolittle). Everyone has enjoyed the visits from our music therapist, Matthew, and there have been lots of interesting noises coming from our classroom!

In Maths, we are continuing to learn about shapes and are also exploring direction (using a compass, clockwise/anticlockwise and map-reading) and angles.

In Science, we are learning about conception, birth and human development.

In English, the boys are using their knowledge of similes and metaphors to write descriptions of pictures. 'The water is as soft as oil,' and, 'Look at the jellyfish glowing pink in the light,' are two examples of beautiful imagery created by them.

At Easter, I am leaving Notton House Academy to move to a school closer to home. I will really miss the boys and am extremely proud of everything they have achieved. It has been very rewarding witnessing their development at Notton and I hope they continue to settle in and thrive. I

would also like to thank parents and carers for all your positive and helpful feedback and communication. Anna x
